PHASE 7 – PROJECT DOCUMENTATION

7.1 Documentation Overview

The documentation phase records the complete implementation of Client Script and UI Policy in the ServiceNow Incident module. It provides a clear explanation of the project, configuration, testing, and results.

7.2 Project Description

The project focuses on improving the ServiceNow Incident form by implementing Client Scripts and UI Policies.

These configurations help control form fields dynamically based on predefined conditions and user actions.

7.3 Technologies Used

- ServiceNow
- Incident Management
- Client Script
- UI Policy
- UI Policy Actions
- JavaScript
- Web Browser

7.4 Configuration Documentation

The following configuration details are documented:

Client Script

- Script Name
- Table
- Script Type
- Condition
- JavaScript Logic
- Active Status

UI Policy

- Policy Name
- Table
- Conditions
- Active Status

UI Policy Actions

- Field Name
- Mandatory setting
- Visible setting
- Read-only setting

7.5 Implementation Screenshots

Screenshots are collected to show the major implementation steps, such as:

1. Incident form.
2. Client Script configuration.
3. Client Script code.
4. UI Policy configuration.
5. UI Policy Actions.
6. Field behavior after applying the configuration.
7. Testing results.

7.6 Testing Documentation

The test cases and their results are documented to verify that the Client Script and UI Policy work correctly.

The documentation includes:

- Test case.
- Test condition.
- Expected result.
- Actual result.
- Test status.

7.7 Project Results

The implemented configuration successfully provides dynamic behavior on the Incident form.

The configured fields respond according to the defined conditions, including mandatory, visible, and read-only behavior.

7.8 Benefits

- Improves Incident form usability.
- Reduces incomplete information.
- Provides automatic field control.
- Improves data consistency.
- Makes Incident handling more structured.
- Reduces unnecessary manual actions.

7.9 Conclusion

The documentation provides a complete record of the Client Script and UI Policy implementation in ServiceNow Incident Management. It includes the project description, configuration details, screenshots, testing results, and final outcome. This documentation can be used for project submission and future reference.
