PHASE 8 – PROJECT DEMONSTRATION

8.1 Demonstration Overview

The final demonstration presents the completed implementation of Client Script and UI Policy in the ServiceNow Incident module. It shows the configuration, working process, testing, and final output of the project.

8.2 Demonstration Objectives

The demonstration aims to:

1. Explain the project purpose.
2. Show the ServiceNow Incident form.
3. Demonstrate the Client Script configuration.
4. Demonstrate the UI Policy configuration.
5. Show the UI Policy Actions.
6. Demonstrate the dynamic field behavior.
7. Present the testing results.
8. Explain the benefits of the implementation.

8.3 Demonstration Flow

UI Policy Actions
↓
Live Working Demonstration
↓
Testing Results

↓
Final Output & Benefits

8.4 Live Demonstration

During the demonstration, the following steps will be shown:

1. Open the ServiceNow Incident form.
2. Enter the required Incident information.
3. Change the field value related to the configured condition.
4. Show the Client Script executing its configured action.
5. Show the UI Policy applying the defined condition.
6. Demonstrate the field becoming mandatory, visible, or read-only as configured.
7. Change the condition and verify the field behavior.
8. Submit the Incident and show the final result.

8.5 Demo Video Requirements

The project demonstration video will include:

- Screen sharing of the ServiceNow instance.
- Voice-over explanation.
- Project name: **Implement Client Script & UI Policy (Incident)**.
- Project purpose and problem statement.
- Technologies and ServiceNow features used.
- Configuration and working process.
- Testing and final output.
- Benefits of the project.

8.6 Final Output

The final output demonstrates that Client Scripts and UI Policies can be used to dynamically control fields in the ServiceNow Incident form according to predefined conditions.

8.7 Project Benefits

- Better Incident form usability.
- Improved data accuracy.
- Reduced incomplete Incident records.
- Automatic field control.
- Consistent Incident data entry.
- Improved user experience.

8.8 Conclusion

The project demonstration presents the complete working implementation of Client Script and UI Policy in ServiceNow Incident Management. The demonstration verifies that the configured functionality works as expected and fulfills the defined project requirements.
